Roblox was created by a company called Ellation. According to Wikipedia, Ellation is a gaming production company based in San Francisco, California. They started out with games that were mainly for children but now have many different types of games in which you can play with your friends and family. Some of the games have mini-games where you can buy special items or earn coins in order to unlock new areas or items. The idea behind robux is that players can earn robux by playing and participating in the game universe. With this system, players do not need to spend money on anything; they just collect more robux as they play in the game. Robux is the virtual currency of Roblox and can be bought in packages or earned in-game.

On January 24th, 2019, ROBLOX released a plan for their future development. The main goal is to separate ROBLOX from its animation engine and make it its own game platform.[107] This will greatly cut down on the amount of time it takes to develop games for the site.

Overall, ROBLOX is fun to use and has many activities for players such as playing games and building creations. The unique graphics that come with each game can be beautiful or affective depending on the type of game it is. For parents that want their children to have fun and have gaming time without the risks of other online games, ROBLOX is a great place to use. This website has safety features for children and parents as well as many other positive features. ROBLOX was mentioned in a Video game advertising case in the Court of Appeals for the Fifth Circuit. The court upheld the game's placement of content, but struck down a provision stating that ROBLOX is an interactive computer service as a matter of law.

In June 2014, ROBLOX introduced their simplified privacy policy and terms of service. Under this policy, all private chats were deleted upon logging out.[4] However, any game-related chats will remain in-game. Users are able to delete their own game-related chats, but deleting a chat does not automatically delete the messages or comments within that chat.

On November 2nd, 2018, ROBLOX announced that the company is looking into implementing state-of-the-art anti-cheat technology. This was made to reduce the chances of "boters" putting random objects in games that don't belong there or making designs that look like they can be through a video editor. The company also stated that if there are any issues with their anti-cheat software, they will let everyone know as soon as possible.[24]
