The free robux script will integrate and use the features of Facebook for comments, sharing and comment posting. You will not have to write any code since the interface provided is done using HTML5 and CSS3 which allows for web developers to build websites that can be programmed using Javascript and CSS3 formatting. This means that not only would it be easy for a person to use the free robux script but also programmatic skills are not required.

As of September 13th, 2018, ROBLOX has officially released the feature for all users.[86] On October 1st 2018, ROBLOX added an update which allowed players to make comments and rate their favorite games and places. The company claims that this feature was added to make it easier for players to find games that they actually enjoy playing.

The Roblox website has undergone several changes in terms of design. All the current releases before October 10, 2010 had a different logo from the one that is currently used. The beta site is also a different color than the current homepage design. If you visit the old Roblox website [1] it will redirect you to the new Roblox website, although on rare occasions it will instead take you to an error page.

In 2018, ROBLOX announced that it will be taking a chunk of its earnings and give it to the developers among them. Some developers are making over \$5,000 USD per month using ROBLOX. Roblox has had two cases with Microsoft. Roblox was originally banned from Xbox Live due to the game running advertisements which violated Microsoft's Terms of Service by being inappropriate for children. The ads contained anime-style nudity and extreme gore. This was later changed however when Roblox reached an agreement with Xbox Live regarding the matter between them.

On March 13th, 2018 the ROBLOX website was temporarily shut down due to multiple exploits on the site. With over 200 million players this has become one of the biggest DDOS attacks in history. The site came back online about 30 minutes later.
