The game's worlds are different from most games on Roblox, because they are not based around themes. This makes the game easier to navigate when learning how the world works, and also allows for more creativity in the types of things that can be made. The world is made up of a variety of things; buildings, vehicles, furniture and objects such as weapons and armor. Each item has its own purpose and will function in the way it was intended for.

ROBLOX released a new website design on September 1, 2018 (9:00 AM). This update changed many things to help revamp the community and also for users. It includes a revamped chat, which is shown on the right. This update added many new features such as "Continuous Games" and "Better Chat". It also added badges for various events.

Robux are the primary currency in Roblox. They can be used to purchase a variety of clothing, accessories (such as hats and T-shirts), tools, gear (backpacks, jet packs, and recovery kits), armor (vests and helmets), vehicles, special movement abilities (for example flying or invisibility), decals (decorative symbols which can be placed on vehicles or buildings) and more. The minimum one-time purchase of Robux is US\$4.95 (\$5 Note: this price has been around since 2013 but was not posted until 2015). Many items require substantially larger sums to afford them.

Even if you do decide to use the free robux promo codes for roblox, there are still risks involved. You should never share any information that can be used to identify yourself with other users in the website. A lot of people will not even want you to have these codes and they will always try to find a way to get them from you. You can easily detect who they are because they will always ask you for the code even if it is against the rules in Roblox itself. They will also tell their friends about how they managed to get a code and ask them if they want this one as well. You can easily avoid these people by knowing where you got your code from and who gave it to you.

At some point in mid-2015, they started using blockchain technology on their games as a way to verify ownership of an in-game item or character and prevent cheating. In December 2016, they launched a new internal system which allowed users to sell their games directly from the ROBLOX catalog instead of uploading them to the website's database.
