ROBLOX also has a plugin called "Google Play", which allows any application made with Google Play's interface to be distributed on ROBLOX. The first release of this plugin was in April 2015, but there have been many updates since then.

ROBLOX also has a wide variety of blueprints ranging from minigames to full games. ROBLOX's game engine runs within their own website, which they call the "Roblox Platform". The platform also has its own virtual servers that are separated between each user (known as Virtual Worlds). ROBLOX licenses the servers from Sabre Corporation. This means that the servers benefit ROBLOX and not any individual person or company. A private server is solely controlled by an individual and can only be accessed through the client provided by them.[33][34]

Roblox Help on Steam (Steam Community) - This is a helpful site where you can find help on Roblox games. There are patches and fixes for the Roblox games that have been developed by the community. If you're having trouble with a game, this is where you should start. You can also find links to all of the Roblox games that have been submitted to Steam and nothing has been updated or released in a while. The page is organized in alphabetical order, so there's a good chance it will be easy to find what you need.

ROBLOX also allows people to manipulate the games in an unfair way; they can do this by changing the difficulty level of a game or removing potential players from playing a game. They also can sell cheat codes on their website. This is similar to the "scams" created by advertisers in that they are selling cheats for an unfairly high price (such as \$2.50 USD) so that only people who pay will be able to use the code to cheat or hack the game. However, this is an unfair way of making money.

Modifying a game's economy and XP system are the most common reasons why a Builder would want to have Builders Club Premium. With it, Builders Club members can gain more XP for everything they do in the game without having to buy anything extra. Modification of XP can also be done via third-party scripts (see below).
