Minecraft 1.6.4 is a new version of Minecraft that's available to download for any interested user! If you're wondering how to get it, this is the guide for you! We've got all the files needed right here for you! Enjoy!,"

How do I join my IP Address to a Minecraft Server? – To connect to a Minecraft server, you will need an IP address or host name of the server.

Connecting your Minecraft server via your IP address is the same as connecting to it directly through the internet without requiring any extra software. The primary way to get an IP address is by going into your internet browser's settings page and finding out what the current addresses given from your provider are for you. If you are using a Bukkit or Tekkit server, then this should be included with their connection instructions. With individual servers, there are a couple ways that you could go about getting this information. The first way would be to simply ask the host if you can connect to their IP address and they will give it to you. Otherwise, you can go through your router configuration page to find out the information that you need."

When you first install your Minecraft server, you need to create a separate user account that has administrator rights. Unless you are planning on running an open-range PVP server, it is best to make sure all access to your Minecraft Server is denied at this point. It is also always a good idea to have a backup of your install in case anything happens. This can help if you need to re-install the server or just get back into the game quickly."

One final mod that is easy to install is a custom graphics pack. This mod will make it so that all of your favorite characters, items, and even textures will be able to be added into Minecraft from this point forward. You can also use different models and even mobs to make a new game that will be unique to you. This is a great mod if it is something that you are looking for."

A Minecraft Server can host as many players as its hosting provider allows, making it the perfect environment for large multiplayer games and events. With mods like Bukkit or Tekkit, you will be able to add an incredible amount of features to your own server without having to pay a subscription fee. This is a great way to get the most out of Minecraft."
