Another really popular mod has to be Minecraft SMP4 Mod which makes all mobs more dangerous than they were before. This makes the game more challenging and a lot more fun as well as a way to add some different life to the game. The mobs will have more health, attack, damage, and range so that it is actually possible for them to take you down. This mod is great if you want an even harder experience than when you are playing by yourself. More Info Download: Minecraft SMP4 Mod OpenBlocks Intelligent In-Game Console",

Realistic resource packs are a good option for adding in visual elements to your game. They will make the world more realistic and give it an old, natural look that may be pleasing to the eye. Other mods may override this however, so if you want your resource pack to be compatible with other mods, you should check each one before getting them listed on your server as addons.",

"Rust's central gameplay is available in both singleplayer and multiplayer modes. When playing on a server with other players, combat is enabled and players must fight or flee from other hostile players who are also scavenging for resources. If a player is killed by another player they will not be able to respawn until they have been to a specified area of the map which acts as the game's 'spawn point'.",

With the release of Minecraft Bedrock Edition, Mojang team also announced that they will support servers better than ever. That means that once you launch a server, no one can stop it unless you shut it down yourself. Before this update, if your Anti-Cheat software is not updated, or you don't have a firewall but still want to run a successful server, people can easily hack into your server and ruin everything. With the new updates coming soon to Bedrock Edition servers, this problem will be solved and everyone will be happy playing on their favorite servers.",
