By Alice M , 2019-01-02

Mobile App: On September 5th, 2018, ROBLOX released their first official mobile app for iOS and Android devices. The app has various features such as the ability to customize avatars, the ability to chat with other Robloxians, even add people as friends. It also allows users to play games that they can't play on their website.

Floating Balls! I have noticed that when you are at a group world and getting on people's chat heads they should be able to fly around like on normal. We need this because there are so many times where such a little bug would make these people mad if they were floating anywhere near them because they would not know what to say. Even though there are thousands of people in the group there should be more room for them to float. I think that there should be more than one chat head. I have seen people report this bug but it has not been fixed and I really want to see it fixed.

All the people who play Roblox have a lot of positive feelings about the game; it's because of this that a lot of people have been telling me that I should get involved with it. I am pretty sure that this is a good idea because I might really benefit from playing the game as well. Since Roblox is constantly being updated, there are many new features that can help me and my friends play together. I also think that it is a great way for me to learn and experience many different things. I really want to get involved with Roblox because I know that it can teach me a lot of things. Also, it is great that I can meet new people online who are my age and like the same things as me.

However, there is no way to directly transfer items or coins between accounts unless both parties are friends with each other on ROBLOX; however they can work around this by transferring the item to a shared place and trading the item from that point.
