Another really cool method that can be used by all of the players is by using the official roblox app. The steps are very simple and you can register your account easily by just providing your username and password. Once you have done that, then you can begin using the free robux generator that is provided in the application itself.

What I would love to see is more updates for games like minecraft, and many more updates. Also to add new games such as an RPG game (something similar to LOTRO) maybe something similar to wow where you come out of the game and control different characters. If we all work together we can get Roblox updated with these new games instead of waiting till now where there are a lot of glitches.

ROBLOX also offers a plugin system similar to most other websites that can give access to nearly all items on its website, except for things like accounts and global objects like chat rooms. Plugin developers can add their own items to ROBLOX through a GUI. However, this is only for private-use plugins and is not available to the public.

ROBLOX also offers badge packages; however there is no way of transferring badges between games. ROBLOX has other games such as "Roblox Heroes", "Roblox D&D", and "The Guild 2" (releasing on December 14, 2014).

In 2015, a study concluded that children under 15 years old had made up 38% of Roblox purchases, which was far less than the games with similar genres such as "Minecraft" or "Grand Theft Auto". However, the study also concluded that players over 15 years old had made up 56% of Roblox purchases. This is because they have more money and influence. In addition, the study reported that Roblox is being used for a variety of purposes such as learning about engineering and architecture.
