The acquisition is part of a strategy by RoLabX to become a global gaming powerhouse with operations in China, with over 50% of revenues coming from China alone by 2021. The deal also confirmed that Tencent will continue to operate as the chief customer and user experience partner for ROBLOX. In late 2015, ROBLOX announced that they would be running advertisements on their site. Unfortunately, these advertisements were run-of-the-mill ads and did not produce any revenue for the company itself but also had a negative impact on their community as they were being flooded with ads featuring nudity, extreme gore, racism and other inappropriate content. In addition to this, many games would feature these ads despite not making any money from them themselves. ROBLOX was banned from Xbox Live in 2015 due to the game running advertisements which violated Microsoft's Terms of Service by being inappropriate for children. The ads contained anime-style nudity and extreme gore. This was later changed however when Roblox reached an agreement with Xbox Live regarding the matter between them.

The Roblox fly hack is not an entirely trackable game. It has been used to cheat on the game, blow up your inventory with limitless weapons and even get the creator's account. The game uses a form of tracking that makes it possible for people to use loopholes in the system and also detect when someone is using these glitches. The creators of the game have done research into ways to combat this issue, however, no viable solution has been found thus far.

In October 2016, many games were allegedly hacked by a group calling themselves "The Bureau". The group claimed to be responsible for hacks on other popular websites such as YouTube, PSN, Microsoft's Xbox Live and Blizzard Entertainment's Battle.net. The group also claimed to have over 2,000,000 players' personal information.

In conclusion, Roblox is not only a highly addictive game but an educational one as well. It is easy to see why so many kids love to play this game! ROBLOX offers a large variety of games for many different audiences. It also has an excellent system for users to generate custom content so anyone can have their dream game. All in all, this is a great game that everyone should try at least once.

The ROBLOX site and forum have received a lot of criticism from its users regarding many issues, such as: Administrators are able to delete user-created games without warning or notice. Users can't defend themselves since the only way they could do so is by contacting an administrator or lawyer. Administrators can ban users for doing anything they don't like or don't agree with. However, administrators have been known to ban users for no reason at all, usually if the user is a moderator or an insignificant/low-level user.
