Roblox is governed by a global moderation team, consisting of volunteers and employees. Moderators monitor Roblox for inappropriate content like violence, nudity, profanity and copyright infringement. Moderators have the ability to mute, ban, or delete users from a game. Players can also report other players for inappropriate behaviour. In addition, moderators are expected to help players in need with moderation and issue resolution.

Some people say that Robux takes too long to obtain in free roam, but with the new update, Roblox changed that by either allowing players to win a certain amount of Robux while playing a game or earn them by watching videos.

My parents really like Roblox and they think it's a great way for me to make friends. They think it's good that I'm able to talk to other people online, meet new people and talk to them offline as well. The game is very social, so they like it because I've made many great friends through playing Roblox. I really enjoy Roblox because it has helped me develop a lot of social skills, and it's also a game where you get to meet new people from all around the world. I will continue playing roblox because it gives me the opportunity to have fun and make new friends.

RobLEX is the currency used on many games running in the ROBLOX Universe, such as RarestMonsters and BLOXelation. It was first introduced in 2017 for the game Shooting Challenge 2. In April 2018, ROBLOX introduced a feature referred to as "LocalScripts." LocalScripts enable users to locally execute C# code in-game. They can be used to access the hardware of a device running the game, or manipulate specific parts of the game. For example, by using LocalScripts, developers can create weapons that change their firing rate depending on how fast you pull the trigger.

This game has many bugs such as glitching which can happen at any time including in games. There is no way to report this glitch due to the fact that the button isn't there and you can only report it from the website. This is extremely annoying because you need to refresh the page and play all over again, but this usually happens when you are about to win.
