People may think that Roblox is a very childish game but in reality it is not. I have seen many adults playing this game, and I believe that they just maybe started in the past few years. The reason why people say Roblox is a child's game is because it has some pretty high minded themes in the games you can play. For example being able to make your own avatar or being able to decorate your own house, these are things that at first glance seems like something you'd do with your friends or family. Of course these are just things to make players feel good about themselves. But really the game is not about anything but just making a character and having fun.

As of March 2017, Roblox has over 64 million users with 30 million monthly active users. In January 2017 it was announced that females now comprise more than 36% of its demographic, up from just 26% in 2015. Roblox has also had a steady increase in overall player count since 2015. In February 2017, Roblox launched a redesign of its user interface, designed to make it easier for new players to learn about the game and play it. Over 200,000 people signed up during the first week of the rebrand.

Also, I would recommend that you check out this article on how to get free robux for roblox where you will learn some interesting methods that can be used in order to generate a lot of free robux for roblox.

In 2010, ROBLOX updated their entire website to match the current version of their branding. The new design was made to be sharper and cleaner than the former one, and removed many visual effects that were seen as archaic and dated. A few key features of this change include a slightly larger "R", as well as a background shape for it similar to that of a "double-r", which ended up being used for every future iteration of the logo. This design is still used on the website today, albeit with variations in how it is utilized.

ROBLOX is built upon a custom system that includes its own scripting language and core programming languages. While it may not be true to say that all games on ROBLOX are made with ROBLOX's scripting language, this is true of the vast majority of games on the site. The scripting language is easy to learn, but more advanced scripting calls can be difficult to implement for users who do not know the syntax or do not have the time. This has led to many third-party solutions (modification of gameplay, ROBLOX engine modifications and others) being made by experienced users so that less experienced users can get a head start in the game development process.
