This method was first used by other players who used this tool and posted how frequently it worked for them. This is a very efficient set of cheats and it is very easy to use in comparison to other similar ones.

In late 2015, ROBLOX introduced ChatPads. These ChatPads function like keyboards for players with a webcam. The players can use a webcam to talk with each other as well as guests while playing the game. However, there are no audio chat functions. One feature of the new chatpads is that if you lock your screen when playing game, it will automatically unlock when you tab out from games to bring up your keyboard and chatpad features.

On September 8, 2018, ROBLOX released an update that added a "New Games" section to its website. This section is separated into sub-categories for ease-of-navigation and new content coming soon. This section also functions as a "curated library" with all games listed in a searchable manner (e.g., "roblox" will bring up any game about ROBLOX, but "roblox experiment" won't).

Roblox has been criticized for the release of their "2018 Summer Update" which featured new clothing items and accessories. The update was released on August 28, 2018, and it caused some of these items to be very hard to find. This resulted in many of Roblox's users spending a lot of money on the platform in order to obtain these new items.

Roblox has also been criticized for not having realistic physics. Roblox used to have a physics engine, but it was removed in 2015. The reason for this was because ROBLOX wanted to focus on improving their building features instead.[60] However, they later explained that this removal was only temporary and they would bring back the physics again in the near future.[61]
