On May 31st, 2019, ROBLOX released an update to their engine which brought along a new physics engine known as "Bloxlet". This engine can be used in nearly all of ROBLOX games and will allow players to play in one of the three different modes: Classic ROBLOX mode which is using the older version of the physics engine from ROBLOX that was introduced on June 12th 2018, Bloxlet mode which uses the new physics system introduced on December 18th 2019, and Customized mode which allows users to customize their own physics setting. It is unknown whether or not this feature will be maintained through future updates.

There are many free ways that can be used to get Robux. The first and foremost way is by getting the Robux from a hack site. Hack sites offer a lot of hacks and tools that might be able to provide you with some Robux in return for completing their tasks or surveys.

On November 29, 2018, ROBLOX announced that they are partnering with Spin Master which will have various toys and scripted interactivity come out in 2019. The app will be called Spin Master Stories.[51] On December 11, 2018, ROBLOX announced that it would be partnering with LEGO to put the LEGO minifigures in the game. The toys will be available as virtual items for purchase.[52]

According to a report by SuperData Research, Roblox had an estimated 5.7 million monthly active users in 2018. The report states that their statistics were based on the call records of around 1 million Android users who are under 13 years old. In their report, the company estimated that 6% of their users were under 12 years old. The reported monthly active users also included those who played Roblox on a daily basis. Their estimate was 14% and they based this on the number of days that players spend playing Roblox on any day. In addition, the report also stated that 32% of their players were in North America and 29% were in Europe.

ROBLOX is also one of the first websites to allow users to play multiplayer games with each other using video chat (most notably Skype). Over the course of the game, players can interact and communicate with each other through 'conversations'. ROBLOX also used Skype for video chat in many of their games. Some unofficial ports of ROBLOX that are based on Build include Mac OS X, Xbox 360, iOS and Raspberry Pi. The Raspberry Pi port allows users to use a Kinect sensor or USB webcam. Mac OS X includes ROBLOX support built into the client and includes limited support for input from keyboards and mice using DirectInput, as well as support for NVIDIA 3D Vision.
