In 2012, ROBLOX changed their logo. In January 2015, ROBLOX released a new website design with a few design quirks (like having your account avatar next to the gamertag that bought it in place of the previously used avatar) and having the games listed below on the homepage after some time for initial release followed by a notification saying they are opening more in 2015. On March 31, 2015, ROBLOX officially confirmed that they are making a game in virtual reality and that they will make a demo by the end of summer.

One of the most popular ROBLOX games was "Hacker Escape", which was one of the most visited blogs on ROBLOX prior to 2011. It was a game where the hacker got into an abandoned house, and used numerous exploits to obtain admin privileges, allowing him/her to modify certain aspects of the game. This blog caused heavy controversy in 2011 because it allowed hackers to manipulate and change the settings on their games without consent from ROBLOX. However, after the release of version 1.0, this blog became outdated because developers started using hacks in their games that had not been discovered yet. In May 2012, ROBLOX launched a new blog system to replace the previous one, this paid-for feature was created by Epic Events Inc.

This hack tool is most likely something that will be used by experienced players, so it should not take a long time for anyone to use it at all. The best thing about this hack tool would be that no one needs any experience or any technical skills in order for it to work properly. All you need to do is simply download the tool, and then you will be able to use it without any problem at all.

On March 13th, 2019, ROBLOX announced that they were working on a new anti-fraud system called "Real Account Verification." This system verifies account information by sending a link from one of their partners to the user's email address. For this new security feature, ROBLOX will be using the services of Verified Identity Partners. The system is expected to be completed in late 2019. [30]
