Roblox has been criticized for bombing players with harassing messages that appear on screen. In 2013, The Washington Post claimed that they were able to set up a fake email address in order to send players fake emails. On November 29, 2018, it was announced that they had removed the ability for players to send fake messages and that they were working on a new update that would do this.

Rated 4 out of 5 by Anonymous from It's really great and I love playing online with my friends. Its a really great game and helps me with my learning skills. I have lots of friends and we sometimes all play online together. It's like virtual reality but not really but still fun to play :)

On January 24th, 2019, ROBLOX released a plan for their future development. The main goal is to separate ROBLOX from its animation engine and make it its own game platform.[107] This will greatly cut down on the amount of time it takes to develop games for the site.

ROBLOX also shares user information such as email addresses with any business partners that are directly involved in the provision of ROBLOX services, such as developers and advertisers. ROBLOX reserves the right to send or share non-personal information with third parties in order to assist them in providing accurate behavioural advertising and targeting.

Roblox has been criticized by parents for issues such as allowing players to have relationships with other users through the game, and allowing players to (unsuspecting) "friend" hackers. Other criticisms include consuming large amounts of bandwidth, and not being child-friendly. The site has been removed from school computers in order to protect children.
