Robux. Robux is the currency of Roblox that can be purchased with real money, although there are also other ways to receive them within the system of Roblox itself. The way they work is very simple - you can use Robux to purchase in-game items, such as clothes for your character or even full-on animations such as dances and others. This adds a form of virtual economy to the game which adds depth and meaning into it - although the impact of the impact that this has on the game can be debated heavily depending on who you talk to. This means that, while there is a sense of the possibility of winning content within the game - there is no chance of getting content without paying for it.

On March 31, 2010, ROBLOX announced that they would be updating their policy on how they handle user information.[1] On May 5, 2010, a mass email was sent out from the company to its users informing them of changes made to their Privacy Policy and Terms of Use. The changes were made in the name of increased safety and security, and it was stated that the change was made in order to "protect [its] members."

Roblox had an accident with the site in early July 2011 when it was down for several days causing some players to be unable to log onto their accounts and play. The site's status was displayed as up by Roblox staff after a few days but only some experienced players were able to log on within those few days.

A game called "The Mad Murderer" has been criticized by Roblox users as being violent. The game allows players to kill other characters by using a knife or a gun. It was reported that German and French users discovered the game while they were in Las Vegas for a conference. In response, Roblox changed the coding of this game so that the users can only use the knife when playing the game, instead of using guns as well. Players who used guns on other players would be banned from Roblox. Roblox stated that they were "going to continue to refine the game".

Games on ROBLOX have many different settings, including combat, customization settings, scenery design, etc. Several games that are featured on ROBLOX have different levels of rules, from the extremely basic "No Rules" or "Give and Take" settings to "No Kill" settings. The more difficult options create a more immersive experience for the players. For example, some games' settings can only be changed by the current owner, while other games have custom-made tools that allow players to modify it at will.[35]
