The free robux script will integrate and use the features of Facebook for comments, sharing and comment posting. You will not have to write any code since the interface provided is done using HTML5 and CSS3 which allows for web developers to build websites that can be programmed using Javascript and CSS3 formatting. This means that not only would it be easy for a person to use the free robux script but also programmatic skills are not required.

This game has many bugs such as glitching which can happen at any time including in games. There is no way to report this glitch due to the fact that the button isn't there and you can only report it from the website. This is extremely annoying because you need to refresh the page and play all over again, but this usually happens when you are about to win.

ROBLOX is a great game, and has lots of potential, but it's not being used as a serious game developer wants it to be. You can't break out of the virtual world without spending money on the Robux currency. It's like a video game and to continue playing you need Robux, but if there is no value in the game then they don't want you to play at all.

On September 20th, 2018 a man by the name of Mathew T. Livingston was arrested for allegedly impersonating another user, and then luring children into sending him explicit photos and videos of themselves. He would then threaten the children with the videos if they would not send him more. [40] [41]

ROBLOX also allows people to manipulate the games in an unfair way; they can do this by changing the difficulty level of a game or removing potential players from playing a game. They also can sell cheat codes on their website. This is similar to the "scams" created by advertisers in that they are selling cheats for an unfairly high price (such as \$2.50 USD) so that only people who pay will be able to use the code to cheat or hack the game. However, this is an unfair way of making money.
