On July 29, 2016 (9:00 AM), ROBLOX released a new website design. This redesign was created in order to make the main site easier to navigate and find what they wanted at a faster pace. There are many new features that make the site easier to manage and update. There are many new pages and features added. The new page layout is designed with ease of use in mind.

What I would love to see is more updates for games like minecraft, and many more updates. Also to add new games such as an RPG game (something similar to LOTRO) maybe something similar to wow where you come out of the game and control different characters. If we all work together we can get Roblox updated with these new games instead of waiting till now where there are a lot of glitches.

What I like about this hack tool is that the entire process will be fully automated. That means that all you need to do is to simply follow the instructions that are provided with it, and then you will start getting free robux right away without spending a single penny. This should be more than enough for many players!

Reddit - There are quite a few forums and subreddits for Roblox, but the one I personally recommend is /r/roblox. It got started years ago and continues to be one of the best places to go on Reddit when it comes to Roblox information. They have a subreddit attached to each game, so you can always find information right where you want it.

Players can review other players' stats in the "Review Player" feature. The player reviewed must have interacted with the player reviewing at least once since the review request was made. A punishment system is also available for players who do not act in accordance with Roblox's terms of service or community guidelines.
