Roblox is one of the most popular online games in existence. In my opinion, this game is extremely fun and great for all ages. Although I have been playing roblox for only about a month now, I still love the game so far. Roblox has a variety of different games in which you can play and I enjoy all of them. Another thing I have learned about roblox is that the company behind it is very kind towards their players. Although there are many things to be aware of when playing roblox, the game has many differences from other games and these things make it better than most.

I just wish we could have stuff like spoons on roblox and we could make furniture like tables and chairs or a cabinet and some chairs for our avatar. Also I want to be able to make my own game make it like Roblox survival! Please please please update roblox so that we can have stuff like spoons and a table and chairs for our avatar thank you. When there is an update that takes away all the content from one of the games I played, it's sad because I enjoyed it... And other people enjoyed it too.

On January 24th, 2019, ROBLOX released a plan for their future development. The main goal is to separate ROBLOX from its animation engine and make it its own game platform.[107] This will greatly cut down on the amount of time it takes to develop games for the site.

The site is very buggy due to the fact that user-created games are made in such a way that users can alter almost every aspect of any game. However, this has upsides too as users can fix most bugs themselves. They have often been taken down because they are "offensive". This is hard to believe since the site has been around for nearly 10 years. ROBLOX allows people to advertise on their site for just about any product they want and will let them earn money with it. However, this can be considered a bad thing in some cases, as advertisers can create "scams", such as charging people \$5 dollars to create a game that can only be played by Admins or other users with unusual settings/roles.

On July 3rd, 2018, ROBLOX announced that they were no longer allowing people to make custom models for their games. Instead, they would be allowing users to build blocky models that could not be edited at all. They stated that this would prevent the creation of custom models and save money by preventing expensive data transfers.[22] The change was made in order to clean up the game because custom models complicates the "Roblox experience" in some cases.
