In August 2021, Facepunch announced a large-scale update for Rust's game world, introducing new areas, biomes and a rebalancing of some gameplay elements. The change was intended as an experiment to determine whether periodic updates could serve as a means of holding player interest for longer periods of time than had previously been possible.",

There are three different ways in which you can connect to a server: first is by using a computer directly connected to the internet through LAN (Local Area Network) port, second is by using a mobile phone, tablet or any other device connected to the internet through WiFi or Data connection. If you choose the second option, please make sure that the username and password you have created for the account on Minecraft Bedrock Server are valid and correct. For best results, you should use a password that will not be easy for hackers to guess and change frequently. Also, please watch out for suspicious emails that inform you about your account and try to trick you into entering your username and password.",

You can easily install the mods that we have listed here onto your own version of Minecraft. The mods have been created by other players, and they are designed to allow people who love Minecraft to take it to new heights. You don't need anything special in order to install different mods into your version of Minecraft, and we are going to give you everything that you need in order to download them right into your game. More Info Download: MINECRAFT MODS",

The worst part is that, there are no anti-cheat systems in Minecraft, so you can just hack all day and night and the server owner will be fine with it. However, this is not recommended because of the consequences you might suffer from when you have a moderator or admin to kick or ban you out. If you want to obtain the same advantages of cheats, but don't want the risks associated with cheats, then try using mods instead.

Unfortunately, pro players who get banned for cheating will use ban evading methods which will allow them to bypass bans or avoid detection from server administrators. Many servers have picked up on this and started filtering IPs for known cheats and ban evaders.",

Multiplayer mode will help you to practice your skills and perfect them while you have a good time with friends on your server. In this mode, each player starts off in their own private world, where they are free to build whatever they like without any limitations. There are no rules and no laws, meaning that you can build whatever you like, but don't forget to choose the right location when building your house. When playing against other players, be careful not to cheat! You can use various cheats to get an advantage over other players though.",
