ROBLOX is among the few websites that provide analytics data on their members. This data is collected from the number of visitors, members and games played. Many large groups have been created to publicize the statistics of ROBLOX. One such group is "We Hate Fake Players", which regularly posts ROBLOX statistics on its profile.[43]

In March 2017, ROBLOX added a new feature that allows builders to use an already existing image of a face as their character's face. The face can be uploaded from the user's computer or through an online camera. This feature has been disabled for the 2017 Halloween game The Mad Murderer.[38]

On March 18, 2017, ROBLOX introduced Virtual Pre-Orders which allow users to purchase merchandise months before it is released for general purchases. These items include apparel and accessories for your avatar. On May 7, 2017 ROBLOX announced the launch of a new virtual item known as the Game Ticket which allows players to purchase one game a month for 6 months (at half price). Players must be signed in and have a valid payment method in order to access the store.

According to the ROBLOX website, there are over 15 million registered and active players. Like many other user-generated content sites for young children, ROBLOX encourages users to be safe and responsible on its site. It also has a moderation system that allows members of the community to report profiles and comments that may be inappropriate or offensive. Parents can also choose what games their kids can play, or even disable chat so other players can't talk to their child. ROBLOX has also introduced a new feature called "Guardians" which works like parental controls on most software. It allows players to set a game rating they are comfortable with, so that they can choose between games.

The only way that these items have any value is if developers add more to the game and make them items that are actually worth something within your virtual world. If that happens then these fake items will be worth even more than what you paid for them originally because the developers added real content to the game.
