Some features that are currently not included in the game but are planned for future iterations include a fully dynamic weather system as well as the ability for players to tame animals and ride them.",

What is a Minecraft Server Offline Mode? – The offline mode for a Minecraft Server means that all of the plugins are turned off and you can just play the game as if it were only you on the server. This is nice for those who just want to play Minecraft on their servers without having to worry about anyone else's creations. It does not mean that you are left in your own world, but rather that your server will be private and no one else can connect unless they know your IP address. If someone were able to connect, then they would simply see a world that is completely empty with no buildings or trees. The only way that anyone would be able to connect to your private server would be from a direct connection through the same IP address that you provide in your network settings. If you do not want to use this method, then simply make sure that nothing can be edited by anyone except for yourself.",

Multiplayer is a lot of fun when you're in a group with friends and family. But it can also be expensive! In order to play multiplayer on Minecraft, you have to pay. This can get pricey unless you are playing on private servers. I would recommend playing with friends or family because that way it will be easier to ask them for help! It's also a lot more fun with friends than on your own.",

The specific hacks used by rust players are often used by other games, and as such have been modified to suit the needs of rust. Using these cheats can result in a game ban on the account in question, but as the game is still in early access this is not guaranteed. Facepunch Studios bans players for using cheats on their servers, however this does not apply to singleplayer and on private servers which do not use the official Facepunch credentials.",
