Mods often change features of your game without actually changing your world. For example, there are mods that simply make you invincible or allow you to fly for unlimited amounts of time. These kinds of mods work by changing the existing rules and code within Minecraft so that they can replace them with new ones. This way they can add new features or block-types to the game without actually having to change your world. These kinds of mods are usually easy to install because they often replace certain files in Minecraft rather than adding anything new to it. Keep in mind that often, when you want to remove a mod that is already installed, you need to uninstall it completely.",
