The game's graphics have been strongly criticized by many gaming journalists, with a few describing it as "looking like a mix between "Minecraft" and "Garry's Mod", developed in 2021". The lead designer of the title stated that low-fidelity graphics were better at promoting the games mechanics rather than high-fidelity graphics. On July 8th 2021, Facepunch Studios announced that "Rust" would be rebuilt with the use of a new development engine in order to create next-generation visuals and longer-term gameplay improvements.",

The gameplay in Minecraft is great, but nothing can beat the feeling of being able to make a zombie run through a field with a machine gun and shoot your friends. There are no rules in Minecraft, which means that you can do whatever you want. Although it is tempting to download those mods that will let you kill your enemies, or add more weapons in the game, it is not recommended because it can be hard to tell which mods are safe to download. Plus, you could end up with some malware on your computer if you don't know what you are doing. It is much better if you choose mods that add something else to the game instead of changing how things work. In my opinion, one of the best mods to download would be N.P.C (non-playable characters) mods. The mod is basically a bunch of programs that you can add to your game, and they will make it much more interesting than it already is. There are plenty of N.P.C mods out there, but one I have found to be very interesting is the Steve mod. The Steve mod allows Minecraft characters (like the player) to run around on their own and move in any direction they want – all you have to do is give them a path to follow by making blocks for them to walk on.",

How to Connect to a Minecraft Server – The way in which you connect to a Minecraft server depends on what kind of server you are using. If you are using a Bukkit or Tekkit server, then the connection will be handled automatically and everything connected through the same IP address. You can connect directly by typing the IP address into your internet browser or the host name of the server. If you are using an individual private server, you will need to know an IP address of where your Minecraft Server is located. The easiest way that anyone can get this information is by going to their router's configuration settings and finding out the IP address given from them. This IP address is different for each device and will be different every time that a person uses it.",
