Media usage and privacy concerns from various sources (see articles) have prompted user action against the company. ROBLOX is a site that allows its users to create their own 3D worlds by building them with the Roblox Studio software. Users can also import their own model and use it in their game. Users can also upload their game and give it ratings on ROBLOX's website. ROBLOX has also allowed users to create art of other games from other developers on YouTube through ROBLOX's brand of accounts created for this purpose. However, they have been criticized for not allowing users to upload custom art they have created into their games, which is done by making custom "Avatar" models for users which can then be used in-game.

On January 19th, 2018, ROBLOX announced that they would be releasing a feature called "ROBLOX Studio Preview". This allows users who have purchased a "Full Studio" to test it before buying it. They will also be able to provide feedback.[85]

The second way is by buying them from any of the websites which offer them as in-game purchases with real money like Amazon or iTunes cards. These cards can also be bought for cheaper rates at places like GameStop or Walmart.

On May 8, 2015, Builder's Club was released for mobile devices. Users can build games on their mobile device and upload them to the catalog. Users can now play on their devices and make money by selling their games. This was the first time a platform has allowed mobile users to make money from their creations. Also in this year, ROBLOX announced that they were giving all accounts \$1 million of Robux for free (for a limited time).
