The best benefits of a Minecraft server are the ability to play with friends no matter what location they are in and the ability to play Minecraft Multiplayer on your own or with any group of players in which you share control of your servers. If you want to enjoy the benefits of a Minecraft server, it is recommended that you go through hosting companies like M2Hosting.com or ProvectusHosting.com, both of which offer complete solutions from start to finish. You will also need to purchase Minecraft server plugins such as CraftBukkit and WorldGuard from the BukkitDev website.",

The original version is available for Windows, OS X and Linux, but updates have also been made available for iOS and Android devices. The game allows players to create their own world with custom rulesets or modify those built by others via the in-game editor, and play with others on dedicated servers or via matchmaking. With access to thousands of in-game objects, tools, and systems, players can create their own businesses and industries in towns and cities or modify the progression of Minecraft according to their own gameplay style.",

Once you open the app, you will see a screen like the one below. Here is where you will choose whether to use "Infinite Resources" or "Instant Builds". The choices are self-explanatory and do not require any additional explanation. Now, tap on the "Start" button and wait for the progress bar to fill completely. When it does, click on the "Start" button again to begin with the process of downloading Minecraft version 1.8 and its features. Once you've purchased Minecraft, you can start building right away. You'll get access to infinite amounts of all the available blocks and items such as wood, wheat seeds and more. This will help you build whatever you want without having to worry about running out of resources. Even if that is not enough, the Instant Build feature will let you build an infinite number of structures in a snap. As soon as the download process completes, tap on the "Start" button once more and you can instantly begin building your world. The faster and more you play, the more you'll enjoy playing Minecraft. However, even if you don't want to play at all or just once in a while, the hack tool will help you build your structures without having to worry about running out of resources. If there is no issue with downloading it, then tap on the "Start" button and begin building!",

There are three different ways in which you can connect to a server: first is by using a computer directly connected to the internet through LAN (Local Area Network) port, second is by using a mobile phone, tablet or any other device connected to the internet through WiFi or Data connection. If you choose the second option, please make sure that the username and password you have created for the account on Minecraft Bedrock Server are valid and correct. For best results, you should use a password that will not be easy for hackers to guess and change frequently. Also, please watch out for suspicious emails that inform you about your account and try to trick you into entering your username and password.",
