Roblox was revealed as the top website for malware infections in the U.S.[74] And as of 2015, it was accused of having more malware downloads than any other website in the world.[75]

The site is very buggy due to the fact that user-created games are made in such a way that users can alter almost every aspect of any game. However, this has upsides too as users can fix most bugs themselves. They have often been taken down because they are "offensive". This is hard to believe since the site has been around for nearly 10 years. ROBLOX allows people to advertise on their site for just about any product they want and will let them earn money with it. However, this can be considered a bad thing in some cases, as advertisers can create "scams", such as charging people \$5 dollars to create a game that can only be played by Admins or other users with unusual settings/roles.

The company's Terms of Service forbids developers from using Roblox's data for marketing purposes including allowing developers to sell their own products on the platform. It also prohibits them from using Roblox's data for behavioral advertising such as ad marketing based on the age groups or ethnicity of an individual user. The report by CNBC states that this can be seen in their products where they use this data to serve ads on other sites that are owned by the company.
