Anthem: On June 15th, 2018, ROBLOX announced a new game called "Anthem". It was a FPS which was heavily criticized for violating many of the company's policies. The game eventually received negative reviews from users who claimed it was simply an unfinished product. The company also ended up making an apology on their website.

On July 31st 2019, ROBLOX announced they would no longer be supporting this feature, and will be removing all games that are now using this physics system from the ROBLOX Catalog. This will affect nearly every game and millions of gameplay hours into future. The reason why they are discontinuing the feature is because most games with custom physics settings were [[Rage Quitters's favorite targets, and almost all of them are either unplayable or broken due to Roblox's buggy physics engine.

I am not a Minecraft addict, but I do enjoy playing that game. However, that is only because my friends and I play it together. Not because of the millions of dollars or diamonds you can get for free on Roblox. People are obsessed with Roblox; my Facebook account was filled with friends who played Minecraft as if they were addicted to crack. They would constantly post pictures about their new lifesize cardboard builds they worked on at home; taking ages-long breaks between each video to watch more videos of minecraft. We've all had friends who were that addicted to Roblox in our time, but I have never met one like Sinead who was "deeply miserable" because she was deprived of playing it. That was always the case whenever anyone mentioned it, I'm sure; parents would frequently ask me if and how I managed to get my grades, and teachers would always ask me if we had any homework. Sometimes they'd even assign us essays to write about our time on Roblox; even though a few months before everyone stopped doing them unless they were mandatory.
