Roblox has been criticized by some users for their use of Facebook data. In April 2018, a report by CNBC claimed that they were able to track user's Roblox activities on Facebook using this data. This included the number of times that they left comments and how much time they spent in a game.

When one makes inappropriate content in Roblox-like swearing in their username or wearing inappropriate clothing they are roleplaying as an adult - the creators aren't doing anything about it. There are moderators but there should be more because some do not care about these problems or do not log on to Roblox at all times.

ROBLOX has also been compared to popular game Minecraft. In many ways, they are similar; both games have been developed by one company (Tencent) and are usually sold on the same platform (Windows, OS X, iOS, Android). Another close similarity is that they both have their own in-game currency system. However, Minecraft has a different style of gameplay relating to platforming, while ROBLOX players build and destroy using building blocks, Minecraft players explore a world.

The Roblox UI has a webcam in the bottom right corner, and many players have found that other players have used this to take pictures of them or record them without permission. This was also reported on an academic blog site.

There are also individuals who try to steal the identity of other users by scamming them through fake free robux videos. These individuals may use other sources in order to get hold of the scripts of these software and modify it in such a way that they get a slice of the profit once it is used by other people.
