Here is the link to MyRoblox. You can also find the very informative "Reddit Facts" page on the Roblox Help site as well, although it is no longer up-to-date. EDIT: This also applies to other games like Robokill, Minecraft and Terraria. Just remember where you find out important information. ;)

The product has received various negative comments on their forums due to the fact that they had broken features, it is unclear why they released the product before fixing all the bugs.

In May 2018, it was reported that the company had over 300 million daily active players worldwide. This includes the users who are in moderation, which is approximately 95% of all players. In addition, based on their own estimates, they stated that over 50% of these players play Roblox daily.

ROBLOX is also one of the first websites to allow users to play multiplayer games with each other using video chat (most notably Skype). Over the course of the game, players can interact and communicate with each other through 'conversations'. ROBLOX also used Skype for video chat in many of their games. Some unofficial ports of ROBLOX that are based on Build include Mac OS X, Xbox 360, iOS and Raspberry Pi. The Raspberry Pi port allows users to use a Kinect sensor or USB webcam. Mac OS X includes ROBLOX support built into the client and includes limited support for input from keyboards and mice using DirectInput, as well as support for NVIDIA 3D Vision.

Rated 5 out of 5 by Anonymous from So much fun I love this game so much! There is no fighting, just chatting with your friends online and there are no missions or quests to complete to play this game. It has no age limit either, so younger kids can join in.
