On August 28th, 2019, ROBLOX announced that they had implemented a new "Safe Chat" feature into their game catalog.[104] This feature would allow users to talk about anything they want while still ensuring that it is kid-friendly. This removes the previous chat restrictions that all users had and makes it so that younger users can play games without worrying about talking to strangers.

Roblox has also been criticized for not having realistic physics. Roblox used to have a physics engine, but it was removed in 2015. The reason for this was because ROBLOX wanted to focus on improving their building features instead.[60] However, they later explained that this removal was only temporary and they would bring back the physics again in the near future.[61]

Roblox users sometimes experience glitches that can let them bypass the moderation system. For example, if a moderator sends you a message and you reply right after they ban you, it will say that your message could not be delivered because they are moderating (unless you previously muted or blocked the user).

Some of my other complaints on Roblox include:

The site is very buggy due to the fact that user-created games are made in such a way that users can alter almost every aspect of any game. However, this has upsides too as users can fix most bugs themselves. They have often been taken down because they are "offensive". This is hard to believe since the site has been around for nearly 10 years. ROBLOX allows people to advertise on their site for just about any product they want and will let them earn money with it. However, this can be considered a bad thing in some cases, as advertisers can create "scams", such as charging people \$5 dollars to create a game that can only be played by Admins or other users with unusual settings/roles.
