Roblox had an accident with the site in early July 2011 when it was down for several days causing some players to be unable to log onto their accounts and play. The site's status was displayed as up by Roblox staff after a few days but only some experienced players were able to log on within those few days.

Rated 5 out of 5 by Anonymous from Awsome This game is awesome! It has so many things to do that are fun and creative. My favorite thing about it is that you can make your own games, and make them have whatever apperance you want. Also you can create things like your own characters and all kinds of other things too! Go try this game out today!

On July 31st 2019, ROBLOX announced they would no longer be supporting this feature, and will be removing all games that are now using this physics system from the ROBLOX Catalog. This will affect nearly every game and millions of gameplay hours into future. The reason why they are discontinuing the feature is because most games with custom physics settings were [[Rage Quitters's favorite targets, and almost all of them are either unplayable or broken due to Roblox's buggy physics engine.

Roblox has been accused of being an unprofitable company that does not pay royalties to its players. One of the users who quit Roblox because of this issue is a user named "Ezthero," a former moderator for ROBLOX's forums. Some others have also left the website after they learned that ROBLOX would get more money from their games if they did not sell them. However, Roblox has said that they do pay royalties to their users but only to those with large fanbases who are able to earn a lot from their games.

So far I haven't really enjoyed ROBLOX because of how serious it is. The game itself just isn't fun and is way too addicting for me. I know some people enjoy it because of how addicting it is but it just isn't fun for me. Why is that?
