Roblox is the currency used on many games running in the ROBLOX Universe, such as RarestMonsters and BLOXelation. It was first introduced in 2017 for the game Shooting Challenge 2. In April 2018, ROBLOX introduced a feature referred to as "LocalScripts." LocalScripts enable users to locally execute C# code in-game. They can be used to access the hardware of a device running the game, or manipulate specific parts of the game. For example, by using LocalScripts, developers can create weapons that change their firing rate depending on how fast you pull the trigger.

On March 22, 2018, it was announced that it's been awarded a Guinness World Record for being the most popular game creation platform. On June 25, 2018, Roblox released a statement concerning maximum levels of moderation following controversy surrounding "Miner's Haven" as well as other role-playing games.

On July 8, 2013 (3:00 PM), ROBLOX released a new website design. The old design was getting outdated and had many bugs that prevented users from accessing all of their content. This redesign changed everything to make it easier for everyone. Other improvements include simplified forum viewing/posting, improved chat system, improved site-searching/navigation, and improved ability to manage groups and groups permissions.

Users can report a game if they feel like it does not follow the rules. Either the game will be deleted or the owner will be warned, but most of the time the game is deleted. On January 5, 2017, a legacy avatar called Trollface became unusable because of DMCA claims from its artist. As such, ROBLOX disabled all avatars that use his artwork. It was later re-enabled after copyright claims were retracted.[39]

Some of the games on ROBLOX display ads on the top of their players' screen during gameplay. The player is able to skip these ads after 5 seconds, but if they do not and instead wait to see them out, then they will receive a small amount of ROBUX. In addition, members receive 30% extra revenue from games with ads placed above them.
