The app has been downloaded over 100 million times and has about 400 million monthly active users as of November 2017. As of December 2018, Tiktok is most popular in India with 55% penetration in India, followed by Brazil with 47%.",

TikTok has also had issues with what type of nudity is allowed on its platform. In August 2018, it was reported that some users had received a notification stating that the app would not allow them to post any more videos containing nudity. The following is an example screenshot of one such policy:",

The criticism of TikTok from a lot of users is not surprising because this platform has been accused of violating its users' privacy in the past. A news article published by a German news outlet noted that "Tiktok is no longer just a fun app for teenagers, but rather an attack tool aimed at the private lives and personal data of young people. The American app is the latest in a series of digital platforms to become notorious for breaches of privacy." The article continued to state that "The cross-platform app just received 10 million at-risk accounts. But this data is second-hand, because Snapchat does not make clear whether the images that appear on its platform are real or not." One of the biggest concerns with TikTok is that it allows users to upload sensitive personal information such as videos which include images of people who may be minors. In addition, if a user's account gets hacked, there is no way for them to know if their account has been used against them in a manner which causes harm or embarrassment. In addition, the app does not make clear to its users which videos are older than 24 hours or indicate that their account has been hacked. A lot of people have also expressed concerns about the fact that they do not know what data is collected and what it is used for by the app and that their privacy could potentially be at risk if they do not understand how to use this app as well as what data is being collected from them.",

TikTok was ranked by App Annie as one of the top most downloaded apps on both Google Play and the App Store during June 2018. It was most popular in India, Philippines and Indonesia. By July 2018, TikTok had reached 1 billion downloads on Google Play alone and over 300 million users who were active within a month. In August 2018, it was announced that TikTok had grown its userbase to 500 million; which is an increase of 100 million users since January 2018. In the same month, the app announced that it had been downloaded over 1 billion times on Google Play.",

In April 2018, musical.ly launched TikTok in Japan and has since amassed a user base of over 20 million users. As of October 2018, it remains the most downloaded app in Japan despite competition from Line. The app was also announced that it would be available for download in Vietnam before the end of that month and did so on September 28th, 2018. Following this launch, the app's popularity increased significantly and took first place among all apps in Vietnam for the second week in November 2018 thanks to its viral success when used by singers who recorded their own take on a hit song "It's Raining Men." In December 2018, the app was launched in Thailand by entertainment conglomerate GMM Grammy after being ranked number one in Google Play for over a month.",
